Project Case Study

Sleek, Space-Efficient Shower Systems for Kō'ula at Ward Village

 *Objectives*

 *Challenges*

 *Solutions*

HMI Glass Multi-Unit Division supplied Skyline Series sliding shower door systems for Kō'ula, a landmark residential tower in Ward Village, the Howard Hughes Holdings master-planned community in Honolulu. Designed by Studio Gang, the tower is part of the award-recognized Ward Village development, known for its nationally honored master plan and sustainability achievements. The project required a refined, high-performance shower enclosure solution to support its modern design and large-scale residential program. HMI Glass delivered its Skyline Series sliding systems throughout, offering a sleek, space-efficient solution built for durability in Hawai'i's coastal environment and consistent performance across luxury residences.
